Advantage Announces \$130 million Trust Unit Financing

CALGARY, ALBERTA – Advantage Energy Income Fund (“Advantage” or “the Fund”) (AVN.UN – TSX, AAV – NYSE) announced today that it has entered into an agreement with a syndicate of underwriters with RBC Capital Markets as sole bookrunner and BMO Nesbitt Burns Inc. as co-lead manager, for the purchase by the underwriters on a bought deal basis, subject to regulatory approval, of 7,500,000 trust units (the “Units”) at a price of \$17.30 per Unit, for total gross proceeds of approximately \$130.0 million. Advantage has granted the underwriters an Over-allotment Option, exercisable in whole or in part up to 30 days following closing, to purchase up to an additional 1,125,000 trust units at the same offering price. If the Over-allotment Option is fully exercised, the total gross proceeds of the financing will be approximately \$149.2 million. A preliminary short-form prospectus will be filed with securities regulatory authorities on or before July 14, 2006. Closing of the offering is expected to occur on or about August 1, 2006. The first distribution for which purchasers of Units issued pursuant to the offering will be eligible will be for the month of August payable on September 15, 2006. The net proceeds of the Offering will initially be used to repay outstanding indebtedness and to subsequently fund capital and general corporate expenditures.

The Units being offered will be eligible for RRSPs, RRIFs, RESPs, and DPSPs, as domestic content. The Units will be offered publicly in Canada (except in Quebec) by way of a short form prospectus. This press release shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of the securities in any jurisdiction in which such offer, solicitation or sale would be unlawful.

The Units have not been and will not be registered under the U.S. Securities Act of 1933 and may not be offered or sold in the United States absent registration or an applicable exemption from the registration requirements of such Act.

Advisory

BOE's may be misleading, particularly if used in isolation. In accordance with NI 51-101, a BOE conversion ratio for natural gas of 6 Mcf: 1 bbl has been used which is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead.
